

Transmittal

Document Submission & Transfer Form

CORRESPONDENCE
TYPE

What is a Transmittal?

A Transmittal is a cover form used when sending documents, drawings, or deliverables from one party to another. It acts as an official record of what was sent, when, and by whom, ensuring full accountability and traceability throughout a project lifecycle.

Document Code:	TRM-XXXX
Transmitted By:	Sender's Name / Company
Transmitted To:	Recipient's Name / Company
Project Name:	Associated project title
Transmittal No.:	Sequential number for tracking
Date:	Date of transmission
Purpose:	For Approval / For Review / For Information / For Record

Key Elements of a Transmittal

- Transmittal Number — Unique sequential identifier
- Project Reference — Ties the transmittal to a specific project
- Document Schedule — List of attached documents with revision numbers
- Purpose Code — Indicates action required (Approval, Review, Information)
- Remarks — Any instructions or notes for the recipient
- Authorised Signature — Sign-off by the issuing party
- Acknowledgement Section — For the recipient to confirm receipt

Common Uses

- Submitting design drawings or engineering documents

- Delivering contractual deliverables to clients
- Forwarding vendor documents for review and approval
- Transferring documents between project teams
